

The Technopoles in Bordeaux

3 Science Parks, a Regional Incubator and a network which will soon include no fewer than 10 Business Incubators host the innovative companies of the Gironde area. Two existing parks dedicated to the themes of Lasers / Optics and Aeronautics / Defence complete the local business support network:

Science Parks

Bordeaux Unitec: located on the campus and created in liaison with the University and research and development laboratories, the Science Park aims to favour the emergence, creation and development of innovative industrial and business services activities directly from technology transfers.

Pépinière Lissandre - Lormont

Enterprise Hotels on the Right Bank

One of the key objectives of city policy on the right bank is the set-up of companies which contribute to creating an urban mix.

Enterprise hotels are part of the sustainable economic development of these areas.

Bordeaux, Cenon, Floirac and Lormont have all approved and committed to the creation of four enterprise hotels.

Of similar design, they are located close to the ring-road on the right bank, and enjoy very easy road access.

The project is organised in a unique complex where 10 to 15 enterprises per Hotel can be set up.

They are all located in **Urban Enterprise Zones** and thus benefit from the corresponding tax advantages.
